

For all walks of life.

## Features & Benefits

For more than 20 years, Protect-All® Flooring has been a trusted commercial flooring solution that can handle the most demanding environments with minimal maintenance. Designed with safety and durability in mind, Protect-All will help you put your best foot forward.

**Slip resistant** – Protect-All is available in a variety of finishes that provide slip resistance. It is a unique feature that can help reduce slips and falls.

**Comfort** – Protect-All provides comfort underfoot and reduces leg fatigue. Tripping hazards are reduced because the need for rubber fatigue mats is eliminated.

**Cleaning** – Protect-All stands up to routine cleaning and requires no waxing or stripping. It is also resistant to bacteria and mildew, making it an excellent flooring solution for kitchens and other wet area applications.

**Non-porous/Stain resistant** – Protect-All is resistant to moisture and chemicals, and will not absorb stains or odors. This makes it ideal for high-impact applications.

**Easy maintenance** – Protect-All can withstand the most demanding use with only minimal maintenance. It does not require re-grouting, special sealants or repairs due to cracking.

**Seams** – Protect-All can reduce your flooring seams by at least 80 percent versus traditional 6-inch square ceramic tile.

**Noise reduction** – With its ¼-inch thickness, Protect-All will make your environment more comfortable by helping to absorb sound. This is especially beneficial in commercial kitchens and animal care facilities.

**Temperature** – Whatever the temperature – steamy to subzero, Protect-All will out-perform similar floors. It is the flooring of choice for several national restaurant chains.

**Environmentally responsible** – Protect-All contains over 90 percent recycled vinyl. Each year, it keeps over four million pounds of vinyl waste out of landfills.

The logo for Protect-All Rapid Weld features the Protect-All logo above the text "Rapid Weld™" in a large, blue, script font.

### Protect-All Rapid Weld™

Our breakthrough installation system significantly reduces labor. Faster and easier than heat welding, Protect-All Rapid Weld™ delivers a waterproof solution designed to support a range of rigorous tasks.
