

## Drain Rings & Transition Strips

Stainless steel drain rings and transition strips are used to mechanically fasten the Protect-All to the substrate around floor drains, floor sinks, plumbing cleanouts, and terminations points of the Protect-All Commercial flooring

### Drain rings

- Add 1/8" to the outside diameter of each drain  
  
Example: A 6" round floor drain will require a 6 1/8" drain ring
- Stainless steel screws and anchors
- E-6100 sealant

### Transition Strips

- Available in 4' and 8' lengths
- Stainless steel screws and anchors
- E-6100 sealant

**NOTE:** E6100 cannot travel by air. It must be shipped by ground transportation
